Security - RFA Vulnerability & Security Posture Management

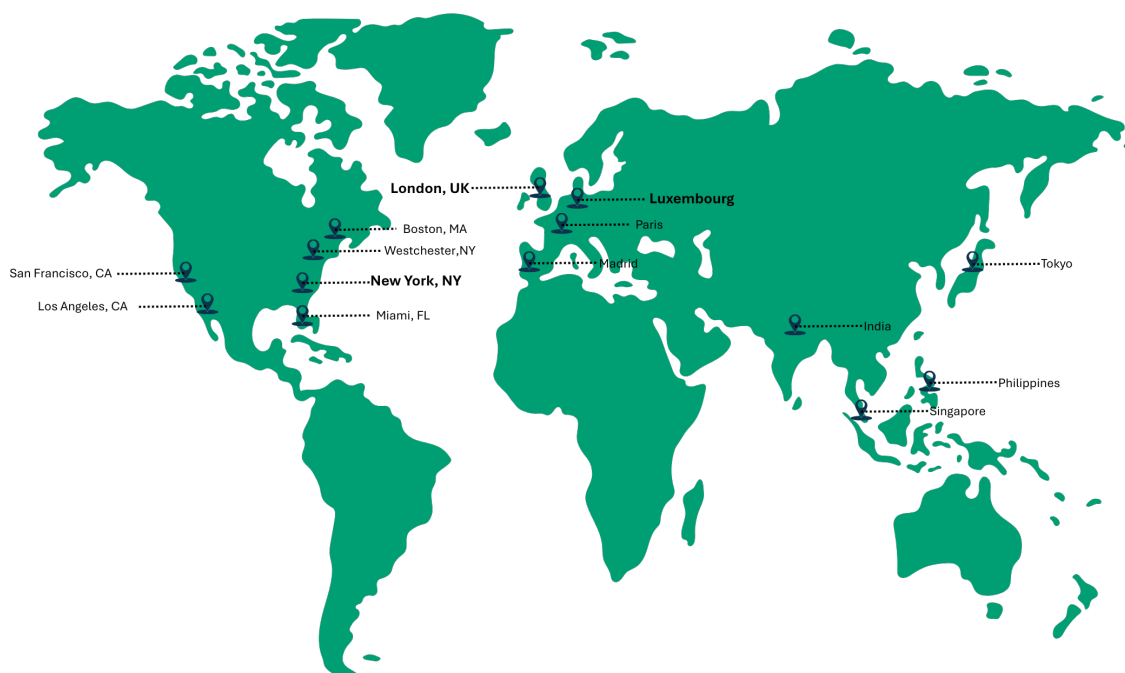

Your Trusted Technology Partner

About RFA

RFA is the Leader in Business and Digital Transformation

A Unique IT, Financial Cloud and Cybersecurity provider to the Financial Services and Alternative Investment Sectors

RFA is the Globally Trusted Partner to the Alternative Investment & Finance Sector. Our pedigree spans more than 35 years providing superior and white glove service levels in a thoughtful, knowledgeable and user experience focused model. Working with the largest Asset Management firms in the world through to Launching Funds, we provide tailored solutions to match our clients' needs and goals from global locations to provide AI driven best in class Support, Cloud services, Cybersecurity, Compliance, DevOps, Automation, and Strategic support.

Facts and Figures

- 14 locations across 3 continents serving a global client base 24/7/365
- 800+ clients
- 300+ engineers
- \$2tn+ in AUM – serviced
- Public Cloud experts for over 15 years
- Private client data facility for 20 years
- Award Winning & Consistently top rated in major industry surveys
- SOC 1 Type II Certifications

- Regulated by the CSSF

Our Four Services Pillars:

End User Experience

- Global Service Desk
- Client Service Engineers
- Dedicated Onsite Engineers
- Account Management
- Procurement Management
- VIP Support
- End User X Performance Tracking
- Pro-active Application Support

Infrastructure and Cloud Services

- Network Engineering
- Server Administration
- Network Operations Centre
- Design Engineering
- Research and Development
- Disaster Recovery

Business Technology

- Automation
- Dev Ops
- Data Management
- Project Management
- Vendor Management
- Business Reporting
- Business IQ Dashboards
- ITIL & Governance Reports

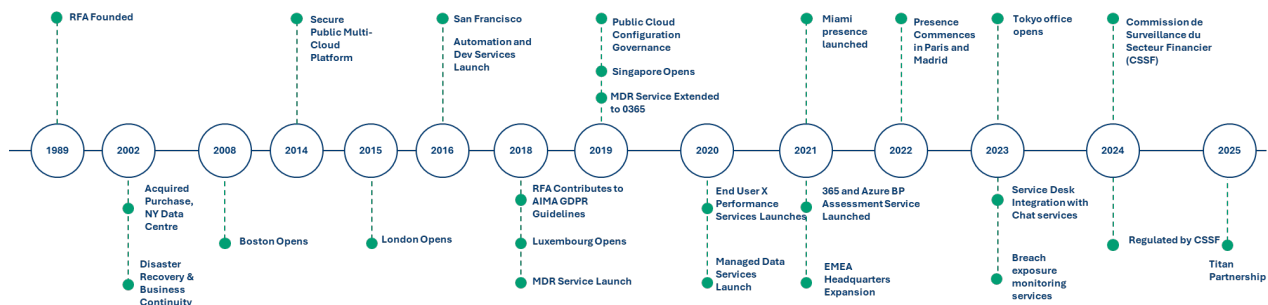

Cybersecurity & Compliance

- Security Operations Centre
- Managed Security Services
- Data Integrity
- AI Governance
- Comprehensive Compliance as a Service
- Risk Register Management
- Policy & Control Maintenance
- Vendor Due Diligence Oversight
- 24/7 Compliance Portal Access
- DDQ Readiness , Reporting and Support

Why RFA?

- Distinguished 35-year service pedigree.
- 24/7, 365 business process solutions resource
- Expert team led by ex-CTO's, CIO's and COO's
- Best-in-class, award-winning and system agnostic
- Customized workflow and IT strategies with multi- path contact options.
- Integration to Live Chat and Client dashboards
- R&D, DevOps, Automation and Robotics capabilities

Proposed Solution

RFA Vulnerability & Security Posture Management

Vulnerability Management is the cornerstone of proactive cyber defense. By detecting and mitigating gaps, dramatically reduce cyber risk and the need to respond to and recover from costly and reputation-damaging breaches. Compliance scanning feature comes supercharged with automated remediation capabilities, meaning issues are not just identified but automatically addressed, round-the-clock.

- Automated Continuous Scanning and Remediation: Stay one step ahead of threat actors across all operating systems, Windows, Linux, Darwin, and ARM
- Missing Patches and Updates Identification: Equip your business to identify missing patches and updates in Microsoft Windows and third-party applications
- Support Over 600 Third-Party Applications: Leave nothing to chance with support for whatever software your clients use
- Automated Scheduling for Continuous Scanning Capabilities: Make your security efforts consistent and rest easy knowing your systems are continuously monitored
- CVE Links: Move beyond identifying vulnerabilities to viewing the evidence and understanding your risks with links to Common Vulnerabilities and Exposures (CVE)
- EPSS Scoring: Learn which vulnerabilities pose the highest risk of exploitation and should be prioritized for remediation with Exploit Prediction Scoring System (EPSS)

Early Detection and Prevention

Regular scans and assessments reveal potential security gaps before they can be exploited by cybercriminals, significantly reducing the risk of data breaches and cyber attacks.

Compliance and Standards Alignment

With evolving regulatory landscapes, Vulnerability Management ensures your organization aligns with critical standards such as GDPR, HIPAA, and PCI DSS, avoiding costly fines and reputation damage.

Enhanced IT Efficiency and Performance

By identifying and addressing vulnerabilities, your IT systems operate more reliably and efficiently, ensuring business continuity and enhanced user experience.

Informed Decision-Making

Detailed reports and analytics provide insights into your security posture, empowering your team to make informed decisions and prioritize remediation efforts effectively.

Strengthened Client Trust

Demonstrating a commitment to robust security practices builds client confidence, fosters stronger business relationships, and enhances your brand reputation.

Project Deliverables

RFA Vulnerability & Security Posture Management

- Deploy agents to supported devices and onboard to the RFA Vulnerability Management platform
- Integrate into the ticketing system
- Configure policies
- Configure reporting

Notes

- Discovery will be required, project deliverables and fees subject to change.
- Any work outside of the project deliverables is out of scope and will be billed at Time and Material rates.
- Any additional requirements or modifications will require a separate engagement and may incur additional costs.
- If applicable, users must be available during the scheduled enrollment phase of the project. Users who are not available during the enrollment phase will be excluded from the process. Enrollment of users outside of the timeframe is not included in this project. The enrollment period of end-user devices spans a maximum of 5 days.
- If applicable, user acceptance testing will be up to 7 days. Once completed, any changes to policies will be billed at Time and Material rates.
- The client will review and confirm within five business days that there are no issues with the project at which point the project will be completed. Any additional work after completion will be BAU work and billed as T&M or against any applicable support agreements you may have.
